SKILLS

Databases

HTML5, CSS, and JavaScript

App Architecture

Communication

Teamwork

LANGUAGES

Spanish

English

German

I am a Computer Science student, motivated to acquire new skills through constant challenges. During my training, I have mastered languages such as Java and C#, and I possess basic knowledge of Python. I have experience in HTML, CSS, and Bootstrap, as well as in managing relational databases (SQL Server, MySQL) and non-relational databases (MongoDB). I handle Git and use GitHub effectively for version control. In backend development, I employ frameworks such as Spring (including Spring Security, Thymeleaf, JPA, among others) to create web applications and APIs. For frontend development, I use Angular with TypeScript for consuming REST services.

Additionally, I have completed certifications for automation tools such as PowerAutomate and PowerApps, and I have basic knowledge of the Microsoft Office suite, including Word, Excel, and PowerPoint.

I consider myself a sociable, committed, and results-oriented person.
